📁 PROFESSIONAL EXPERIENCE

06/2025 – Present
30 N Gould St Suite R,
Sheridan, WY 82801,
United States

Ripplix

Software Engineer

- Build customize Web Application, Figma Plugin with React, Laravel, MySql etc.
- Secure Restful API Development using php, Laravel.

09/2024 – 06/2025
Dhaka, Bangladesh

9AM Solution

Jr. Developer-Web Technologies

- Built and managed web applications using Laravel, including integration of APIs, managing databases, and setting up user authentication.
- Worked on requirements analysis and turning them into practical solutions.

11/2024 – 01/2025
Dhaka, Bangladesh

9AM Solution

Intern Supervisor

- Supervised an intern team, providing guidance, technical support, and performance reviews to ensure project delivery.

05/2024 – 08/2024
Dhaka, Bangladesh

9AM Solution

Developer-Intern

- Designed and developed the company's official website from scratch using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL.
- Built a dynamic, fully functional site with an admin panel for easy content management.
- Integrated third-party APIs to enable advanced features like document editing.

📁 PROJECTS

07/2025 – 11/2025

Ripplix 2.0

React, Laravel 12, Auth0, MySQL

A curated micro-interaction web application that helps designers and developers understand how animations and transitions look in real-world scenarios.

- Stripe subscription model with feature-based access control.
- Create user boards to save and organize favorite interactions.
- Share boards with teams or individuals.
- Follow favorite apps to personalize the interface.
- Advanced filtering system.
- Interactive dashboard with roles, permissions, and user management.
- Subscription-based model implementation.

12/2025 – 01/2026

Ripplix Figma Plugin

Preact with typescript, laravel api

A lightweight and high-performance Figma plugin built to connect design assets with a web platform.

- Built with Preact and TypeScript for fast and optimized UI.
- Integrated with Laravel API for backend communication.
- Secure authentication system implementation.
- Real-time data fetching and synchronization.

- Seamless bridge between Figma and the web platform.

02/2026 – 05/2026

Automation Kit Marketplace

Laravel, MySQL, NextJs, TypeScript, Tailwind

Developed a multi-vendor e-commerce platform focused on selling digital products such as automation workflows (e.g., n8n, Zapier-type solutions).

Worked on an existing codebase using **Next.js** for the frontend and **Laravel API** for the backend, enhancing performance and scalability.

Implemented advanced features including:

- Smart filtering and search functionality, Improve design according to user requirements.
- Secure isolation and privacy for individual vendor scripts

Designed and integrated flexible payment systems:

- One-time direct purchase option
- Subscription-based plans with proper usage limitations

Continuously improved the system by optimizing user experience, ensuring secure transactions, and maintaining clean, scalable code architecture.

11/2025 – 12/2025

E-Commerce Website

Laravel, blade, tailwind, mysql, javascript

A full-featured e-commerce platform developed for online product sales and order management.

- Built with Laravel, Blade, Tailwind CSS, MySQL, and JavaScript.
- Dynamic product listing with category-based filtering.
- Shopping cart and checkout system implementation.
- Order management and customer handling system.
- Responsive and user-friendly interface design.
- Secure backend architecture with database-driven content management.

05/2024 – 08/2024

Official Website of gAM Solution

HTML, CSS, Bootstrap, JS, PHP, MySql

- Developed a responsive and user-friendly website for the company's official use.
- Enabled easy content updates through a dedicated admin panel.
- Included a feature for rich document editing to enhance user interaction.

04/2025 – 04/2025

Consultancy Firm Website

HTML, CSS, JavaScript

- A responsive clear frontend project done for the client where simple frontend technology used like HTML, CSS, BootStrap, JavaScript.

Insurance Cost Prediction System

Python, Linear Regression, Scikit-learn, Pandas, NumPy , Matplotlib

- Developed a system using machine learning with the perspective of an insurance company to predict the total cost for clients.
- Used a linear regression model to analyze and forecast costs based on client data.
- Provided the company with insights to make more informed decisions about client pricing.

EDUCATION

2020 – 2024

Dhaka, Bangladesh

B.Sc. in Computer Science and Engineering

Green University of Bangladesh

CGPA: 3.49 out of 4.00

Thesis: Detection of Autism Spectrum Disorder using Machine Learning: A Multi-model Algorithm Approach

SKILLS

Programming Language

C/C++, Java, JavaScript, PHP

Database Environment

SQL Server, MySQL

Language

Proficient at communicate in English and documentation.

Environment

VS Code, PyCharm, CodeBlocks, Netbeans, Matlab.

Frameworks & Libraries

Laravel MVC, React, Preact, NextJs

Version Control

Git

Others

Problem Solving, Data Structures and Algorithm, Object Oriented Programming (OOP), Requirement Analysis, Research and Development, Machine Learning, Continuous Learning.

AI Tools Proficiency

- Experienced in using **Claude and Codex** for AI-assisted development, Content Generation.
- Utilize AI for faster coding, debugging, and problem-solving.
- Leverage AI tools to improve productivity and code quality.

ONLINE PROBLEM SOLVING

LeetCode

Solved 100+ Selected Problem 

Lightoj

Solve 100+ Problem containing basic, medium and hard type problem. 

AWARDS

26/08/2024

Exceptional performance as Intern

At gAM Solution, as a developer intern received rising star award and recognize as top performer.
